**MISSOURI TECHNOLOGY EDUCATION GUIDE**  
**2002 v. 2.1**

## Resources

The electronic age has given our profession an avalanche of information almost at our fingertips. It is impossible to list in a single document all the resources available. In addition, resources today may or may not be reliable. Therefore, it is important to have a means of continual oversight of the reliability and timeliness of information. For this reason, this guide will provide only a few critical links to web sites that can “jump-start” a search for information. The first link will take you to the Career and Technology Education web site at Central Missouri State University - where you will find a “Resource” link that will give you up-to-date information. This web site will be maintained for currency and reliability as well as relevance to the profession. Teachers who use the site are welcome to pass on information they feel is important for the profession and give feedback on current listed sites.
